

# Building Cisco Multilayer Switched Networks (BCMSN)

## Table of Contents

### Module 1

#### Defining VLANs

##### Lesson1

- **Implementing Best Practices for VLAN Topologies**
  - Describing Issues in a Poorly Designed Network
  - Grouping Business Functions into VLANs
  - Describing Interconnection Technologies
  - Determining Equipment and Cabling Needs
  - Mapping VLANs in a Hierarchical Network

##### Lesson2

- **Implementing VLANs**
  - Describing End-to-End VLANs
  - Describing Local VLANs
  - Benefits of Local VLANs in an Enterprise Campus Network
  - VLAN Configuration Modes
  - Explaining VLAN Access Ports
  - Describing VLAN Implementation Commands
  - Implementing a VLAN

##### Lesson3

- **Implementing Trunks**
  - Explaining VLAN Trunks
  - Describing ISL Trunking
  - Describing 802.1Q Trunking
  - Explaining 802.1Q Native VLANs
  - Explaining VLAN Ranges
  - Configuring Trunking

##### Lesson4

- **Propagating VLAN Configurations with VTP**
  - Explaining VTP Domains
  - VTP Modes
  - Describing VTP Pruning
  - Describing VTP Operation
  - Describing VTP Configuration Commands
  - Configuring a VTP Management Domain
  - Adding New Switches to an Existing VTP Domain

##### Lesson5

- **Correcting Common VLAN Configuration Errors**
  - Describing Issues with 802.1Q Native VLANs
  - Resolving Issues with 802.1Q Native VLANs
  - Describing Trunk Link Problems
  - Resolving Trunk Link Problems
  - Common Problems with VTP Configuration
  - Best Practice for VTP Configuration

### Module 2

#### Implementing Spanning Tree

##### Lesson1

- **Describing the STP**
  - Describing Transparent Bridges

- Identifying Traffic Loops
- Explaining a Loop-Free Network
- Describing the 802.1D STP
- Describing the Root Bridge
- Describing Port Roles
- Explaining Enhancements to STP

#### Lesson2

- **Implementing RSTP**
  - Describing the RSTP
  - Describing RSTP Port States
  - Describing RSTP Port Roles
  - Explaining Edge Ports
  - Describing RSTP Link Types
  - Examining the RSTP BPDU
  - Identifying the RSTP Proposal and Agreement Process
  - Identifying the RSTP TCN Process
  - Describing PVRST Implementation Commands
  - Implementing PVRST Commands

#### Lesson3

- **Implementing MSTP**
  - Explaining MSTP
  - Describing MST Regions
  - Describing the Extended System ID
  - Interacting Between MST Regions and 802.1Q
  - Describing MSTP Implementation Commands
  - Configuring and Verifying MSTP

#### Lesson4

- **Configuring Link Aggregation with EtherChannel**
  - Describing EtherChannel
  - Describing the PAgP and LACP Protocols
  - Describing EtherChannel Configuration
  - Configuring Port Channels Using EtherChannel
  - Configuring Load Balancing over EtherChannel

## Module 3

### Implementing Inter-VLAN Routing

#### Lesson1

- **Describing Routing Between VLANs**
  - Inter-VLAN Routing Using an External Router
  - Describing Inter-VLAN Routing Using External Router Configuration Commands
  - Configuring Inter-VLAN Routing Using an External Router
  - Explaining Multilayer Switching
  - Frame Rewrite
  - TCAM Table

#### Lesson2

- **Enabling Routing Between VLANs on a Multilayer Switch**
  - Describing Layer 3 SVI
  - Describing Config. Comm. for Inter-VLAN Communication on a Multilayer Switch
  - Configuring Inter-VLAN Routing on a Multilayer Switch
  - Describing Commands for Routed Ports on a Multilayer Switch
  - Describing Routed Ports on a Multilayer Switch
  - Configuring Routed Ports on a Multilayer Switch

### Lesson3

- **Deploying CEF-Based Multilayer Switching**
  - Explaining Layer 3 Switch Processing
  - Explaining CEF-Based Multilayer Switches
  - Identifying the Multilayer Switch Packet Forwarding Process
  - Describing CEF Configuration Commands
  - Enabling CEF-Based MLS
  - Describing Common CEF Problems and Solutions
  - Describing CEF Troubleshooting Commands
  - Troubleshooting Layer 3 CEF-Based MLS

## Module 4

### Implementing High Availability in a Campus Environment

#### Lesson1

- **Configuring Layer 3 Redundancy with HSRP**
  - Describing Routing Issues
  - Identifying the Router Redundancy Process
  - Describing HSRP
  - Identifying HSRP Operations
  - Describing HSRP States
  - Describing HSRP Configuration Commands
  - Enabling HSRP

#### Lesson2

- **Optimizing HSRP**
  - Describing HSRP Optimization Options
  - Hello Message Timers
  - HSRP Interface Tracking
  - Tuning HSRP Operations
  - Describing Load Sharing
  - Describing HSRP Debug Commands
  - Debugging HSRP Operations

#### Lesson3

- **Configuring Layer 3 Redundancy with VRRP and GLBP**
  - Describing VRRP
  - Identifying the VRRP Operations Process
  - Configuring VRRP
  - Describing the GLBP
  - Identifying the GLBP Operations Process

## Module 5

### Wireless LANs

#### Lesson1

- **Introducing WLANs**
  - Wireless Data Technologies
  - Wireless LANs
  - WLANs and Other Wireless Technologies
  - WLANs and LANs

#### Lesson2

- **Describing WLAN Topologies**
  - WLAN Topologies
  - Typical WLAN Topologies

- Roaming Through Wireless Cells
- Wireless VLAN Support
- Wireless Mesh Networking

### Lesson3

- **Explaining WLAN Technology and Standards**
  - Unlicensed Frequency Bands
  - WLAN Regulation and Standardization
  - IEEE 802.11b Standard
  - IEEE 802.11a Standard
  - IEEE 802.11g Standard
  - 802.11 Comparison
  - General Office WLAN Design
  - WLAN Security

### Lesson4

- **Access Point Basic Configuration**
  - Autonomous Access Point Configuration
  - Role of Autonomous Access Points in a Radio Network
  - Autonomous Access Point Configuration via the Web Browser
  - Lightweight WLAN Controller Configuration

## Module 6

### Configuring Campus Switches to Support Voice

#### Lesson1

- **Planning for Implementation of Voice in a Campus Network**
  - Explaining Converged Network Benefits
  - Describing VoIP Network Components
  - Explaining Traffic Characteristics of Voice and Data
  - Describing VoIP Call Flow
  - Explaining Auxiliary VLANs
  - Describing QoS
  - Explaining the Importance of High Availability for VoIP
  - Explaining Power Requirements in Support of VoIP

#### Lesson2

- **Accommodating Voice Traffic on Campus Switches**
  - QoS and Voice Traffic in the Campus Model
  - LAN-Based Classification and Marking
  - Describing QoS Trust Boundaries
  - Configuring a Switch for Attachment of a Cisco IP Phone
  - Describing Basic Switch Commands to Support Attachment of a Cisco IP Phone
  - What Is Cisco AutoQoS VoIP?
  - Configuring Cisco AutoQoS VoIP on a Cisco Catalyst Switch

## Module 7

### Minimizing Service Loss and Data Theft in a Campus Network

#### Lesson1

- **Understanding Switch Security Issues**
  - Overview of switch Security
  - Describing Unauthorized Access by Rogue Devices
  - Switch Attack Categories
  - Describing a MAC Flooding Attack
  - Describing Port Security
  - Configuring Port Security on a Switch
  - Port Security with Sticky MAC Addresses
  - Authentication, Authorization, and Accounting
  - Authentication and Authorization Methods

- 802.1x Port-Based Authentication

#### Lesson2

- **Protecting Against VLAN Attacks**
  - Explaining VLAN Hopping
  - Mitigating VLAN Hopping
  - VLAN Access Control Lists
  - Configuring VACLs
  - Explaining PVLANS
  - Configuring PVLANS

#### Lesson3

- **Protecting Against Spoof Attacks**
  - Describing a DHCP Spoof Attack
  - Describing DHCP Snooping
  - Configuring DHCP Snooping
  - Describing ARP Spoofing
  - Describing DAI
  - Describing Commands to Configure DAI
  - Protecting Against ARP Spoofing Attacks

#### Lesson4

- **Describing STP Security Mechanisms**
  - Protecting the Operation of STP
  - Describing BPDU Guard Configuration
  - Describing BPDU Filtering Configuration
  - Describing Root Guard
  - Describing Root Guard Configuration Commands

#### Lesson5

- **Preventing STP Forwarding Loops**
  - Describing UDLD
  - Describing Loop Guard
  - Configuring UDLD and Loop Guard
  - Preventing STP Failures Caused by Unidirectional Links

#### Lesson6

- **Securing Network Switches**
  - Describing Vulnerabilities in the CDP
  - Describing Vulnerabilities in the Telnet Protocol
  - Describing Vulnerabilities in the SSH
  - Describing vty ACLs
  - Describing Commands to Apply ACLs to vty
  - Best Practices: Switch Security Considerations
